Dehradun, Uttarakhand

CS undergraduate with production-style systems experience across distributed backends, payments infrastructure, and AI-driven tooling;
open to relocation for internships abroad.

EDUCATION

Graphic Era Hill University

Bachelor of Technology (B.Tech.) in Computer Science and Engineering – CGPA: 7.11/10

Dehradun, India

Aug 2024 – Jun 2028

WORK EXPERIENCE

Trainee Developer

Jul 2026 – Present

iOS Student Developer Program – Apple & Infosys

Dehradun, India

- Selected as 1 of 100 students from a pool of 2,000+ applicants across 4 Graphic Era campuses after qualifying the Infosys technical assessment and four days bootcamp for a one year training program.
- Undergoing training in native iOS application development using Swift and Xcode, building hands-on projects under Apple's curriculum alongside mentors and a cohort of peer developers.

Artificial Intelligence Intern

Jul 2026 – Aug 2026

Mirai School of Technology

Remote

- Developed AI-powered applications across Natural Language Processing, Computer Vision, and Data Science using Python while applying software engineering best practices.
- Built RepJudge, a Streamlit + Gemini Vision app that scores pushup/squat form from a live camera photo and returns structured, checkpoint-level biomechanical feedback, and Life-OS, a Streamlit wellbeing dashboard that visualizes screen-time trends and uses the Gemini API to generate a personalized AI coaching ledger from daily usage data.

Full Stack Web Development Intern

Jun 2026 – Aug 2026

Technology Business Incubator (TBI), Graphic Era University

Hybrid

- Developed a full-stack booking platform named VanaVas, using React, Node.js, Express, MongoDB, and Tailwind CSS, delivering production-ready features while collaborating with mentors and rapidly learning unfamiliar systems.

PROJECTS

PayFlow v2 – Multi-Language Production Payments System | Go, Scala, Ruby, PostgreSQL, Docker | [Link](#) | [CI Results](#)

- Architected a fault-tolerant payment platform with double-entry ledger bookkeeping, idempotent payment processing, and deterministic replay to guarantee consistency of financial transactions.
- Built secure REST APIs with HMAC-SHA256 authentication, webhook verification, and Stripe-style Idempotency-Key support; used Go goroutines for concurrent request handling, token-bucket rate limiting, and Docker containerization across a multi-language microservice architecture.
- Load-tested the API in CI with k6 at 161 req/s and a 2.81ms p95 latency across 12,897 requests, with automated enforcement of latency/failure-rate thresholds; maintained 50.7% Go, 83.3% Ruby, and 67.7% Scala test coverage, all tracked on every push via GitHub Actions.

VibeOps – Multi-Agent AI Orchestration Framework | Python, LangGraph, ChromaDB, OpenAI | [Link](#)

- Designed a LangGraph-based multi-agent orchestration framework with semantic memory using ChromaDB and modular, independently testable AI workflows.
- Integrated OpenAI APIs with retry mechanisms and graceful failure recovery to improve execution reliability, backed by a unit-test suite to catch regressions across agent workflows.

ATSly – AI Resume Analyzer | Python, NLP, Machine Learning | [Link](#)

- Built an ATS resume analyzer using TF-IDF, cosine similarity, semantic matching, weighted keyword scoring, and PDF/DOCX parsing.
- Implemented resume scoring, keyword extraction, and personalized optimization recommendations for software engineering resumes.

TECHNICAL SKILLS

Languages: Java, C++, Python, Swift, Go, Ruby, Scala, JavaScript, SQL

Frameworks & Libraries: React.js, Tailwind CSS, Node.js, Express.js, FastAPI, Streamlit

Databases: MongoDB, PostgreSQL, SQLite, ChromaDB

Cloud & DevOps: AWS, Docker, Git, GitHub, Vercel, Render, Streamlit Community Cloud

Core Skills: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design, Git, unit testing, CI-friendly project structure

AI/ML: LangGraph, OpenAI API, Gemini API, Gemini Vision API, Natural Language Processing (NLP)

Problem Solving: 400+ Data Structures & Algorithms problems solved on LeetCode (83.9% acceptance rate) — Arrays, DP, Greedy, Trees, Graphs, Backtracking, MySQL

CERTIFICATIONS — [VIEW ALL CERTIFICATES](#)

AWS Certified AI Practitioner & AWS Certified Cloud Practitioner — Amazon Web Services

Agentic AI Certified Foundations Associate — Oracle

MongoDB AI & Data Strategy Certifications — MongoDB Basics, Vector Search Fundamentals, RAG Apps, AI Agents, AI Data Strategy
